## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election with traverse of group 1A in Paper No. 12 is acknowledged. The traversal is on the ground(s) that Group II includes antennas substantially similar to the antennas defined by group I. This is not found persuasive because group II discloses antenna consisting of a coaxial cable while group I discloses an MR antenna consisting of conductors which are not considered necessary similar. A coaxial cable by definition is a kind of cable with a solid central conductor surrounded by insulator, in turn surrounded by a cylindrical shield woven from fine wires. It is used to carry high frequency signals such as video or radio. However, a coaxial cable is not necessary an antenna which is defined only as an electrical device that sends or receives radio or television signals. An antenna is commonly constructed by numerous conductors coupled in different structural forms to transmit the signal, for example, a birdcage antenna. Stating that an antenna could be constructed with a coaxial cable, in conclusion is not equivalent to an antenna constructed by conductors. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. The same reasoning applies to groups A-F.

In regards to new claims 86-88, claim 86 is classified under group 1 A (elected group) and claims 87 and 88 are classified under group I C (non elected group).

The requirement is still deemed proper and is therefore made FINAL.

Art Unit: 2862

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Double Patenting***

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claims 1-18, 22-26, 30-36, 61-70 and 86 are directed to the same invention as that of claims 1-57 of commonly assigned application # 09/738233. The issue of priority under 35 U.S.C. 102(g) and possibly 35 U.S.C. 102(f) of this single invention must be resolved.

Since the U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302), the assignee is required to state which entity is the prior inventor of the conflicting subject matter. A terminal disclaimer has no effect in this situation since the basis for refusing more than one patent is priority of invention under 35 U.S.C. 102(f) or (g) and not an extension of monopoly.

Art Unit: 2862

Failure to comply with this requirement will result in a holding of abandonment of this application.

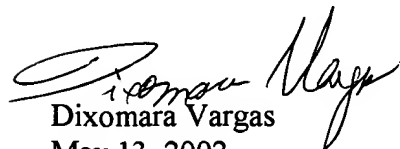

5. Claims 1-18, 22-26, 30-36, 61-70 and 86 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1-57 of copending Application No. 09/738233. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.
